

PRACTICAL SHEET

MAKE A BEAUTIFUL VIDEO WITH A SMARTPHONE

WOULD YOU LIKE TO INTERVIEW A MEMBER OF YOUR COMMUNITY WHO INSPIRES YOU?
WOULD YOU LIKE TO FILM AN EVENT TO SHARE WITH OTHER PEOPLE?
HERE ARE SOME TIPS TO HELP YOU MAKE A VIDEO WITH YOUR MOBILE PHONE EASILY

STEP 1: FIND YOUR TOPIC

- A video **is a message** that we want to convey through images. Before filming, organize your ideas and think about the message you want to convey.
- Who is concerned by your subject? Who could talk about it?

STEP 2: PREPARE YOUR FRAME

- Choose a **suitable** spot where you will **not be disturbed** (by traffic, car horns...)
- Film with **lighting behind your back** (the sun, a lamp...) so that the light is reflected on the people you are filming

STEP 3: CHECK THE STORAGE SPACE

- Don't forget to check that there is enough **free storage space** on the phone.
- In general, it is mobile apps, videos and music that use the most memory.

STEP 4: FILM!

- **Shoot horizontally.** Your video will be in 16/9 format and it can be viewed in full screen.
- **Pay attention to stability.** If you move too much, your image will be jerky and difficult to look at. Remember to hold your phone firmly, if possible, with both hands.
